Interesting Things
1. I took an HTML class in high school and I thought it was super interesting.
2. The rate at which AI is progressing, i.e self driving cars etc.
3. I don't know if this is technically computers, but touch screens amaze me and idk why.
4. The history of computers is interesting, i.e Alan Turing etc.
5. The computerization of jobs. I.E computers taking human jobs is an interesting topic to debate

Challenging Things
1. Getting a file to open up using python code. I struggled with that last term :(
2. I tried to make a game of solitaire last term for my final project and I wasn't able to get most of it to work.
3. Coding in general is kinda challenging ngl
4. I never organize my folders so it's hard to find the stuff I'm looking for so it's like an extra challenge for me that I could fix, but don't.
5. Raspberry pi is interesting, but I can't wrap my head around it? It just confuses me for some reason lol.
